Homeopathy

A Natural, Safe and Effective Method of Treatment

Like cures like

This is the foundation of homeopathy, a proven system of medicine which can cure many problems considered incurable by conventional medicine. It sees all symptoms as arising from one core disease. The symptoms are not the disease, but the body's attempt to heal itself. The disease is actually a 'mistunement' of the body's energy. Conventional treatment attempts to force symptoms to disappear with medication, which is not the same as curing. If a disease is truly cured, the symptoms go away permanently, and no further treatment is needed.

The goal of homeopathy is to achieve the highest possible level of health

How is homeopathy different from conventional medicine?

Conventional medicine considers some symptoms to be unrelated to an animal's 'condition', but homeopathy sees them all as a part of the disease process, and important in selecting a remedy. Homeopathic medicines help to strengthen the body's natural defense mechanism, in contrast to conventional medicine, which uses potent chemical drugs to suppress symptoms, which are the body's attempt to heal itself.

Advantages of Homeopathic treatment:

SAFETY

There are no side effects or interactions with other medicine.

COST

Less expensive than conventional medicine by huge margin.

CURE

The idea of curing chronic disease is unheard of with conventional treatment.
