

"Let food be your medicine".

Hippocrates said this a long time ago, and it is still true today.

Food = Fuel

Good diet = Health

A good diet is the most important factor for good health. Better fuel for the body means a stronger immune system and more efficient repair of problems.

A fresh food diet based on raw meat is ideal, as most commercial diets don't provide good nutrition. If you do feed commercial diets, look for foods which contain mostly meat, NO by-products, NO preservatives, NO artificial coloring agents, and very little grain.

Dogs and cats do best on a diet of fresh meat, and cooked vegetables, even if only fed as supplement. If you must feed store brought food, choose from those listed here, and read labels carefully to see what your pet is really eating. Research websites, and read one of the many good books available on natural pet nutrition.

Good pet food choices:

DOGS:

RAW MEAT AND FRESH BONES!

Blue Buffalo, Canidae, Evanger's, Fromm Family Foods, Nature's Variety, Solid Gold, Taste of the Wild, Holistic Select, Wellness, Innova
